PROJECTS

PROJECT: Educational Website

A secure web application that provides user registration, login, and OTP-based email verification.

- Developed user registration and login functionality using Spring Boot.
- Implemented OTP verification system via email for enhanced security.
- Designed responsive dashboard, profile, and settings pages using HTML & CSS.
- Created session-based authentication with login and logout features.
- Integrated MySQL database for storing user data.
- Added profile update functionality with image upload.

Technologies Used: Java, Spring Boot, Thymeleaf, HTML, CSS, MySQL.

PROJECT: Job Portal Web Application

Developed a full-stack Job Portal web application for job seekers and recruiters.

- Implemented secure authentication and role-based access (Admin/User) using Spring Security.
- Built modules for job posting, updating, deleting, and job applications.
- Designed an admin dashboard to manage jobs and applications.
- Used MySQL for database management and Spring Boot for backend development.

Technologies Used: Java, Spring Boot, Spring Security, MySQL, Thymeleaf, HTML, CSS, Bootstrap
